RE: interoperability

Dear FCC,

I support the petition to require VRS interoperability because I am
frustrated with the different ways to call people on videophone. I
have to wait for 20 minutes or more to make a call. That's not good.
I don't like that my VRS is blocked and sometimes I have to wait to
make a call my doctor or important call at that specific time.
It is verimportant to make everyone equally accessible be setting
up ONE system just like the telephone. More easier without waiting.
The different ways cause stress and can put us at risk. Please make
whole video relay service (VRS) equal with same system.
Thank you for this opportunity to make my comment.
Christina
